

➤ NYPI | NANYANG POLYTECHNIC INTERNATIONAL

Over the years, we have established a strong international presence. With the setup of Nanyang Polytechnic International (NYPI) in August 2007, we have been able to bring the world to NYP and NYP to the world.

NYPI focuses on enhancing the NYP brand name in technical education and training beyond Singapore. It contributes in strengthening NYP's existing international partnerships and collaborations, as well as in creating more opportunities for students and staff to be engaged in international exchange and attachment programmes. Among other things, NYPI also facilitates the conduct of courses for international participants who wish to learn more about NYP's successful pedagogic and management concepts, in particular the NYP Teaching Factory™ Concept or to emulate the Teaching Factory™ model.

As the vehicle to extend the NYP Teaching Factory™ and other concepts, NYP's expertise and NYP's education and training programmes into the region and beyond, NYPI contributes towards the development of NYP into a global polytechnic of distinction. This was endorsed by Minister for Education Heng Swee Keat in his speech delivered at the dinner on 30 March 2012 to celebrate NYP's 20th Anniversary: "NYP has made significant progress in twenty years, to deliver a world-class, high-quality polytechnic education to our young generation today."

To date, NYPI has conducted courses for more than 10,000 international participants from some 40 countries worldwide. It offers programmes in NYP concepts for technical and vocational education and specialised areas in information communication technology, multi-media and digital animation technology, advanced manufacturing technology, mechatronics technology, electronics engineering, life sciences, nursing and healthcare, business management, institute management and pedagogy.

Offering a wide range of manpower development programmes for overseas professionals, NYPI's training is customised to meet the specific requirements of the client organisations and participants. These programmes support the Singapore Government's initiatives, as well as meet the training needs of the various overseas organisations.

Participants of the training programmes include senior government officials, academics, principals of technical colleges, specialist teachers and senior management staff from the public and private sectors. They have consistently given excellent feedback on the quality of training received, the professionalism and dedication of NYP staff, and the friendship and hospitality experienced.

These programmes provide opportunities for our staff to visit cities in regional countries and to interact with their senior officials and professionals; thus allowing them to better understand the countries' social, economic and political trends and developments. As a result, our staff are able to incorporate a regional and international perspective into their teaching, helping our students to gain a better appreciation and understanding of different cultures and practices.

In addition, students gain overseas exposure from the five student project centres in China, which have been set up with the support of NYPI. They are located in Beijing, Suzhou, Guangzhou and Chengdu.

We aim to inculcate in our students a global mindset and inspire them to take on the challenges of a fast-changing world. For enquiries on NYPI's international programmes, please contact:
